## Announcing the Opening of Our New Headquarters and Factory

- Yushin Precision Equipment -

### 1. Opening of Our New Headquarters and Factory

Yushin Precision Equipment Co., Ltd. today held a opening ceremony for its new headquarters and factory building after a few years of construction.

As we celebrate the opening of our new facilities, we would like to express our deep gratitude for your cooperation. All of our staff are now fully ready to step up their efforts to meet your expectations. We would appreciate your continued support.

---

<Aim of the construction of new headquarters and factory of the Yushin Precision Equipment Co., Ltd.>

#### 1. Integrating the production area

- To enhance productivity, the production area in our headquarters and factory site has been integrated to perform all processes seamlessly, from acceptance of parts, materials and equipment to assembly, inspection and shipping of products.

#### 2. Responding to more orders for large machines

- To meet more orders, the area for assembly and inspection of large take-out robots has been expanded, with an open ceiling space that extends through three floors to secure sufficient height.

#### 3. Streamlining and sophisticating operations through better communication

- The floor layout has been designed to foster internal communication. For example, sales, development, design and administration functions are grouped on the fourth floor of the headquarters building.

#### 4. Creating an environment where employees can work together with a feeling of greater enrichment

## 2. New Corporate Logo Design

We launched our new corporate logo at the same time as our fresh start at the new headquarters and factory.

The over-30-year-old logo, that has been familiar to our customers and partners, was created by outlining our founder Susumu Kotani's handwriting, representing his quest for "Innovation Next," which means furthering technology innovation, and "Heartful Technology," which suggests the pursuit of cooperation between human and machines.

Our new corporate logo design reflects our intention to maintain his vision and our aspiration to reach new heights at the new site.

The new corporate logo symbolizes our pursuit of speed, high quality and strength, as well as relationships and bonds with people inside and outside the company. In particular, the initial "Y" in the logo has a line that stretches upward to the right, implying Yushin's innovative capacity. Where this climbing line reaches lies a future in which Yushin will make contributions and realize developments through its Heartful Technology.

The logo for YUSHIN is displayed in a bold, dark blue, italicized sans-serif font. The letter 'Y' is stylized with a thin line extending from its top-right corner upwards and to the right, symbolizing growth and innovation.
