Clamping force 100 - 350 tf

Vibration control

Power-saving

Low posture (Double speed mechanism)

All-axis servo-driven

Developed to achieve "high-speed, high-rigidity," "downtime reduction," and "running cost reduction."

- Compressed air economizing tool Smart ECO Vacuum
Yushin has refined our unique ECO Vacuum technology to reduce compressed air consumption even further. Smart ECO Vacuum monitors vacuum pressure continuously to optimize suction timing. As a result, robot air consumption can be economized by as much as 78%, which can lead to lower electricity costs for air compressors and reduced capital expenditures.
- Productivity improvement
Faster, more accurate high-speed take-out with standard machines
High-rigidity vertical and kick units ensure fast, accurate operations.
- E-touch II
Equipped with easy-to-use E-touch II controller with 10.4-inch display for intuitive operation.
