### Developed to achieve "high-speed, high-rigidity," "downtime reduction," and "running cost reduction."

- Compressed air economizing tool Smart ECO Vacuum  
Yushin has refined our unique ECO Vacuum technology to reduce compressed air consumption even further. Smart ECO Vacuum monitors vacuum pressure continuously to optimize suction timing. As a result, robot air consumption can be economized by as much as 78%, which can lead to lower electricity costs for air compressors and reduced capital expenditures.
- Productivity improvement  
Faster, more accurate high-speed take-out with standard machines  
High-rigidity vertical and kick units ensure fast, accurate operations.
- E-touch II  
Equipped with easy-to-use E-touch II controller with 10.4-inch display for intuitive operation.
